✅ Teaching Strategy for Bootcamp

- Give kids **choice of style** (1–10).
- Ensure that **no more than 3 students pick the same one** at once.
- Encourage them to **experiment**: change images, tweak gradient colors, or adjust font sizes.
- Show them how **just CSS** can make identical HTML look *completely different*.

👉 Do you want me to **bundle these 10 hero styles into a ready-to-use CSS file**, so kids can just copy/paste their chosen style into their project?
